Basic Fire Awareness Course

The Fire awareness training course is aimed at all members of staff, to ensure they understand what is expected of them in the event of a fire or emergency situation, and also to be more observant of fire safety issues around site.

Course Content:

- Provides an understanding of the interaction between fire and persons at work.
- Provides a basic understanding of responsibilities under fire safety legislation.
- Chemistry of fire and how to avoid a fire occurring.
- Action to be taken if a fire occurs.
- Fire extinguisher training (Theory & Practical)
- Course duration 1 ½ hours

Fire Wardens/Marshall Course

The Fire Warden Training Course provides participants with a comprehensive knowledge of their duties and actions to be followed during a fire. As an important component of the training a practical demonstration regarding escape routes and identification of hazards is also included. Participants will also gain valuable 'Hands On' experience using a fire extinguisher.

Our team of experienced Instructors deliver this course making it realistic and memorable for the participants. This course can be delivered 'on site', anywhere in the United Kingdom.

The training course also includes open discussions to ensure the content is relevant for the participants and their work environment.

The course enables staff with an enhanced fire safety role to meet the training requirements detailed in the current workplace fire safety legislation. In particular, they will learn how to:

- Identify possible fire hazards in the workplace.
- Assist in the fire risk assessment process.
- Understand how fires can occur and how fire and smoke can spread.
- Identify the correct type of fire equipment for the class of fire.
- Identify if your premises are equipped with appropriate fire alarms, detectors, emergency lighting and fire fighting equipment.
- Ensure fire equipment is inspected and maintained as frequently as necessary.
- Advise staff on measures to reduce the risk of fire occurring, and on action to take in the event of an emergency.

Course Content:

- Legislation module
- Theory of fire and smoke behaviour
- Identify possible fire hazards in the workplace
- Fire prevention
- Human behaviour and fire fighting
- Role and responsibilities of fire wardens
- Fire evacuation procedures (site specific)
- Fire safety in the home
- Fire extinguisher training (Theory & Practical)
